Product Data Sheet

Updated : April 2008 Supersedes : March 1996

Product Description

Scotch-Weld Adhesive 3748 is a tough, flexible hot melt adhesive which exhibits excellent low temperature thermal shock properties with good heat resistance. It shows high peel adhesion to many substrates especially normally hard to bond materials such as polypropylene and polyethylene.

3748 also exhibits excellent electrical and non-corrosive properties.

Applications	 3748 is particularly suitable for the bonding and rigidisation of components on printed circuit boards where thermal and mechanical shock resistance is required. 3748 is also suitable for bonding low energy plastics such as polypropylene and polyethylene. Typical uses for 3748 include rigidising components, potting, wire fastening, sealing connectors, vibration protection, stabilising loose components, coil termination, coil 			
	attachment, holding components prior to soldering, insulation of bare conductors, polyolefin box bonding and sealing polyolefin coated carbon boxes.
